ENGR. JETRON J. ADTOON

Research Coordinator, College of Engineering
Education University of Mindanao

Dear Engr., Jetron Adtoon,

We hope this letter finds you in good health and high spirits. We are writing to request an extension for the completion of our thesis titled "**NATURAL LATEX RUBBER MONITORING SYSTEM WITH YIELD DATA VISUALIZATION**". We understand the importance of adhering to deadlines; however, due to unforeseen circumstances, we find it necessary to request an extension.

We have encountered significant difficulties related to the lack of essential materials and compatibility issues with the equipment necessary to proceed with our research effectively. Despite our best efforts to procure the required resources, we have faced delays beyond our control. Moreover, the site designated for our study has been found to be abandoned, requiring permission from the owner for access. Securing this permission has proven to be a time-consuming process, further impeding our progress.

Considering these circumstances, we kindly request for an extension of **2 weeks starting May 6, 2024 until May 21, 2024** to allow for the resolution of the challenges and the successful completion of our thesis. We assure you that we are fully committed to completing our research within the extended timeline and will provide regular updates on our progress. We understand the importance of adhering to project deadlines and apologize for any inconvenience caused by this request.

Thank you for your understanding and consideration of our circumstances. We look forward to your favorable response.

Sincerely,

Leanox U. Colis
